REVIEW OF THE NEW MEXICO CHILD SUPPORT GUIDELINES

NEW MEXICO CHILD SUPPORT GUIDELINES SCHEDULES F AND G AND HIGH-INCOME FORMULA: SUPPLEMENTAL INFORMATION

2018 CHILD SUPPORT REVIEW COMMISSION

Michael Nelson Commission Chair Deputy Secretary and Acting Director Human Services Department Child Support Enforcement Division Santa Fe, New Mexico	The Honorable Gerard Lavelle Second Judicial District Court Albuquerque, New Mexico
Sarah Batzli, Esquire Deputy Director of Legal Services Child Support Enforcement Division Santa Fe, New Mexico	Betina McCracken Deputy Director of Field Operations Child Support Enforcement Division Santa Fe, New Mexico
Representative David Gallegos District 61 Representative Eunice, New Mexico	The Honorable Matthew Wilson First Judicial District Court Santa Fe, New Mexico
Stephen Klump, Esquire Domestic Relations Hearing Officer Second Judicial District Court Albuquerque, New Mexico	The Honorable Chief Judge James Martin Third Judicial District Court Las Cruces, New Mexico

Administration and Technical Assistance

Administration and technical assistance were provided through staff and administrators with the New Mexico Department of Human Services: Melinda Pineda (Child Support Enforcement Division Policy Manager); Anthony Webb (Child Support Enforcement Division Deputy Director); Jeremy Toulouse (Child Support Enforcement Division Regional Operations Manager); and Becky Jiron (Child Support Enforcement Division Attorney IV). Economic analysis and technical assistance were provided to the Commission by Dr. Jane Venohr, an economist and research associate with Center for Policy Research.

PURPOSE AND BACKGROUND

New Mexico child support guidelines are set in state statute (NMSA 1978 §40-4-11.1). Federal and state law require that the appropriateness of the guidelines be reviewed at least once every four years.¹ The federal requirements for state guidelines and each state's periodic review of its guidelines are conditions for approval of the state plan for child support (42 U.S.C. §667).

In December 2016, the federal requirements of state child support guidelines expanded.² To this end, New Mexico's 2018 guidelines review not only focused on meeting the federal requirements that have been in place since 1989, but also on meeting the expanded requirements. Adoption of the recommendations in this report will bring New Mexico into compliance with the federal requirements in effect today.

Federal Requirements of State Child Support Guidelines

The major federal requirements that have been in place since 1989, and are still in place, are:

- Have one set of guidelines to be used by judges (and all persons within a state with the authority) to issue a child support order;³
- Consider all earnings and income of the noncustodial parent in the calculation of support;⁴
- Provide for the child's healthcare coverage;⁵ and
- Review their guidelines at least once every four years; and, in that review, consider the findings from an analysis of case file data on guidelines applications and deviation, and economic evidence on the cost of raising children.⁶

New Mexico has always met these requirements. New Mexico's last guidelines review was conducted in 2014. The 2018 review also meets these requirements.

The expanded federal requirements are:

¹U.S.C. §667(a) and NMSA 1978 §40-4-11.3.

² U.S. Department of Health and Human Services. (Dec. 20, 2016). "Flexibility, Efficiency, and Modernization in Child Support Enforcement Programs." *Federal Register*, Vol. 81, No. 244, p. 93562. <https://www.gpo.gov/fdsys/pkg/FR-2016-12-20/pdf/2016-29598.pdf>.

⁵ 45 CFR § 302.56(c)(2).

⁶ 45 CFR § 302.56(h).

- A state's guidelines must take into consideration the basic subsistence needs of the noncustodial parent who has a limited ability to pay;⁷
- If imputation of income is authorized under the state's guidelines, it must also take into consideration the specific circumstances of the noncustodial parent to the extent known, such as the 14 specific factors identified in the federal rule;⁸
- A state's guidelines may not treat incarceration as voluntary unemployment in establishing or modifying support orders;⁹
- As part of a state's guidelines review, a state must:
 - Consider labor market data by occupation and skill-level, the impact of guidelines amounts on parties with incomes below 200 percent of the federal poverty guidelines, factors that influence employment rates among noncustodial parents and compliance with child support orders, and analyze rates of default and imputed child support orders and orders determined using the adjustment for the noncustodial parent's subsistence needs;¹⁰
 - Provide opportunity for public input, including input from low-income parents and their representatives and the state/local IV-D agency;¹¹ and
 - Make all reports public and accessible on the internet, make membership of the reviewing body known, and publish the effective date of the guidelines and the date of the next review.¹²

Much of the federal rule changes are aimed at improving child support policies for low-income parents. The rule changes are grounded in research that finds compliance is lower and significant arrears accrue when income is imputed.¹³ The specific concern is when income is imputed beyond what an obligated parent—particularly, an obligated parent with income

below or near poverty— actually has or has the capacity to earn. The federal rule changes also recognize the importance of healthy parent-child relationships in the development of children and how unpaid child support in some situations can adversely affect that healthy relationship.

FORMATION OF COMMISSION, PUBLIC INPUT, AND PUBLICATION OF REPORTS AND DATES

The Child Support Review Commission was formed in August 2018 by the New Mexico Child Support Enforcement Division (CSED) and as provided in NMSA 1978 §40-4-11.3. The composition of the Commission reflects a wide range of stakeholders, including many with a focus on low-income parents. Commission members are listed after the title page of this report.

Public Input

The Child Support Guidelines Review Commission held two public meetings in which public comment was also solicited. The first meeting was held on September 28, 2018 in Santa Fe and linked to videoconferences in Las Cruces, Santa Fe, Roswell, Farmington, Hobbs, and Silver City to allow public participation from other areas of the State. A public announcement about the meeting and videoconference was released in advance of the hearing, as well as a solicitation for written comments. Meeting notices were posted on the CSED Internet website as well in all CSED field offices.

The September meeting was chaired by HSD Deputy Cabinet Secretary and acting CSED Director Michael Nelson and Commission members in attendance were: Hearing Officer Stephen Klump, Judge James Martin (via video conference), Judge Matthew Wilson, Sarah Batzli and Betina McCracken. Absent Commission members were Representative David Gallegos and Judge Gerard Lavelle. Public in attendance of the meeting had no comments and no written comments were received. Dr. Jane Venohr, an economist with Center for Policy Research (CPR) who has national expertise in child support guidelines, presented to the Commission. She was retained by CSED to provide information on the cost of child rearing. Her report and report supplement is attached to this report.

A second meeting of the Commission was held on November 8, 2018. The November meeting was chaired by HSD Deputy Cabinet Secretary and acting CSED Director Michael Nelson and Commission members in attendance were: Hearing Officer Stephen Klump (via video conference), Judge James Martin (via video conference), Judge Matthew Wilson, Sarah Batzli and Betina McCracken. Absent Commission members were Representative David Gallegos and Judge Gerard Lavelle. Public in attendance of the meeting had no comments and no written comments were received.

Publication of Reports and Dates

Reports considered by the Commission were made available to the public on the CSED website. This included the CPR reports attached to this report. The intent of the first report was to provide information to be used by the Commission to develop recommendations. It summarized the federal requirements of state child support guidelines, the economic basis of the existing New Mexico child support schedule, findings from the analysis of case file data on guidelines deviations and guidelines applications, income imputation and default, use of low-income adjustments, and payment data, relevant labor market data, and the most current economic data on the cost of raising children, and used it to develop an updated schedule. The report also reviewed how other states were meeting the new federal requirements and how the New Mexico guidelines compared to guidelines of neighboring states. The supplemental CPR report provided refinements to the proposed, updated schedule contained in the September report. The refinements were based on the Commission's recommendations.

The entire meeting transcripts were also made available on the CSED website.

The effective dates of the recommendations are contingent on the New Mexico legislature adopting changes to the guidelines. The next guidelines review will be in 2022.

ASSESSMENT OF NEW MEXICO'S COMPLIANCE WITH NEW FEDERAL REQUIREMENTS

Consider the Basic Subsistence Needs of the Parent

Most states, including New Mexico, base their child support schedule on economic data on the cost of raising children. In addition, most states make some sort of adjustment for incomes at or near the federal poverty level for the basic subsistence needs of an obligated parent. Most states address the basic subsistence needs of the obligated parent by providing a self-support reserve that typically relates to the federal poverty guidelines for one person, which is \$1,012 per month in 2018. If the obligated parent's income is below the self-support reserve, a state-determined minimum order is applied. For incomes just above the self-support reserve, the order amount is based on the difference between the obligated parent's income and the self-support reserve.

The existing New Mexico schedule incorporates a self-support reserve into its schedule, but it is not readily apparent.¹⁴ Further, the existing New Mexico guidelines do not provide a clear minimum order. To explicitly meet the federal requirement to consider the basic subsistence

¹⁴ Another issue with the self-support reserve in the existing schedule is it cannot be specified as an exact dollar amount due to the formation of the existing schedule which was a compromise of the 1994 schedule and the schedule proposed in 2007. Those two schedules contain different self-support reserve amounts.

needs of the obligated parent, the Commission recommends making the self-support reserve transparent. In addition, the Commission recommends setting it at \$1,000 per month, which approximates the current federal poverty guidelines level. The Commission also recommends a minimum order of \$60 per month for one child and an additional \$15 per month for each additional child. The \$60 per month is rooted in research that finds that the average value of voluntary in-kind contribution made by low-income fathers is about \$60 per month.¹⁵ It is also slightly more than the \$50 per month used by most states. A minimum order establishes the precedent that each obligated parent has a financial responsibility to his or her children. Although some states are adopting zero minimum orders, the Commission believes it is in the best interest of New Mexico children and families to set a precedent that all parents are financially responsible for their children.

Income Imputation

The federal intent of the rule pertaining to income imputation is to more thoroughly consider the circumstances of an obligated parent, particularly various factors affecting a low-skilled, low-income parent's capacity and ability to earn income (e.g. literacy and the local job market), before imputing income. Thus, the federal rule aims to end the practice of routinely imputing income at minimum wage among unemployed and marginally employed, low-income parents without thorough investigation and consideration of that parent's ability to earn minimum wage.

The existing New Mexico provisions for income imputation¹⁶ are not as thorough or detailed as provided in federal regulation,¹⁷ albeit some of the detail suggested in federal regulation exists in caselaw (e.g., the consideration of local labor market conditions).¹⁸ The Commission's recommendation is to bring New Mexico into compliance with federal regulations on income

¹⁵ See Rosen, Jill. (2015). "Many 'deadbeat dads' support children through gifts, not cash, study shows," John Hopkins University. <http://hub.jhu.edu/2015/06/15/how-low-income-dads-provide>, and Kane, J., Nelson, T. and Edin, K. (2015). "How Much In-Kind Support Do Low-Income Nonresident Fathers Provide? A Mixed-Method Analysis." *Journal of Marriage and Family*, 77 (June 2015): 591–611.

¹⁶ NMSA 1978 §40-4-11.1 C.(1) " '[I]income' means actual gross income of a parent if employed to full capacity or potential income if unemployed or underemployed. Income need not be imputed to the primary custodial parent actively caring for a child of the parties who is under the age of six or disabled. If income is imputed, a reasonable child care expense may be imputed. The gross income of a parent means only the income and earnings of that parent and not the income of subsequent spouses, notwithstanding the community nature of both incomes after remarriage; and... ."

¹⁷ 45 CFR § 302.56(c)(1)(iii). If imputation of income is authorized, takes into consideration the specific circumstances of the noncustodial parent (and at the State's discretion, the custodial parent) to the extent known, including such factors as the noncustodial parent's assets, residence, employment and earnings history, job skills, educational attainment, literacy, age, health, criminal record and other employment barriers, and record of seeking work, as well as the local job market, the availability of employers willing to hire the noncustodial parent, prevailing earnings level in the local community, and other relevant background factors in the case.

¹⁸ See *Quintana v. Eddins*, 2002-NMCA-008, ¶ 16, 131 N.M. 435, 38 P.3d 203.

imputation provisions in child support guidelines by addressing the factors noted in federal regulation.

Voluntary Unemployment among Incarcerated Parents

The issue of income imputation also covers the specific federal regulation pertaining to incarcerated parents, which states:

Provide that incarceration may not be treated as voluntary unemployment in establishing or modifying support orders; and... (45 CFR § 302.56(c)(3)).

The federal regulation aims to avoid the practice of imputing income to an incarcerated parent beyond what he/she actually has in income or can reasonably earn during incarceration, specifically, by presuming that incarceration is voluntary. In other words, if an incarcerated parent was making \$50,000 per year as an accountant before incarceration, the incarcerated parent's income could be imputed at \$50,000 per year if unemployment is deemed voluntary, but could not be imputed at \$50,000 per year if unemployment is not deemed voluntary. The rule change recognizes a significant proportion of obligated parents are incarcerated and significant arrears often accrue in these cases.¹⁹

New Mexico has one of the highest proportions of children with incarcerated parents. A national study by the Annie E. Casey foundation found that 52,000 children in New Mexico in 2010-11 (which is 10 percent of all New Mexico children) had a parent in jail or prison at some point in their childhood.²⁰

The Commission recommends adoption of language that conforms to the federal regulation, but also does not exclude the minimum order amount from being ordered when the obligated parent is incarcerated, and gives the Court discretion to impute income to an incarcerated parent if there is evidence of other factors indicating that income imputation is appropriate.

FULFILLMENT OF FEDERAL REQUIREMENTS TO ANALYZE DATA

Economic Data on the Cost of Raising Children

The Commission considered the economic evidence on the cost of child rearing presented by Dr. Venohr. Specifically, this included a summary of the nine economic studies underlying current state guidelines and five newer economic studies. The studies vary in their data years and their methodologies. The Commission also considered economic evidence on the cost of living difference between New Mexico and the U.S. average. The Commission recommended updating the schedule using a schedule developed by Dr. Venohr that is based on current economic evidence on the cost of raising children but adjusted for differences in New Mexico and average U.S. prices.

The Commission recognizes that the proposed updated schedule is less than the existing schedule at very high incomes (above combined gross incomes of \$8,000 per month). This is because the existing schedule amounts are set at amounts in between the 1994 schedule amounts and the amounts of the updated schedule proposed in 2007; and, the 1994 schedule assigned percentages to gross incomes above \$8,000 per month that were not based on economic evidence of child-rearing expenditures. The compromise was made to lessen the large changes that would have occurred if the updated schedule proposed in 2007 had been adopted.

More information about the data and assumptions underlying the proposed schedule is included in the attached CPR reports.

Examination of Case File Data

CSED provided case file data to CPR to fulfill the federal requirements to analyze case file data on the application and deviations from the guidelines, as well as rates of default and imputed child support orders, use of the low-income adjustment, and payment data. CSED extracted the case file data from its automated system. The extract included all intrastate orders that were newly established or modified sometime in state fiscal years 2016-2017. This amounted to 5,290 cases for the analysis.

The child support guidelines were applied in 96.4 percent of the cases examined. In other words, the guidelines deviation rate was 3.6 percent, which is essentially unchanged from previous years. Most (62%) current support orders covered one child, 27 percent covered two children, and 11 percent covered three or more children. The father was the parent obligated to pay support in 91 percent of current support orders. In the 9 percent of current support orders where the mother was ordered to pay support, the father was usually the custodial

parent, although there was a significant share of cases in which the mother had to pay support to a relative because the child was in the care of that relative (e.g., a grandparent).

Monthly support orders for current support averaged \$356 per month. Few (4 percent) of orders were set at \$100 per month or less. In contrast, Arizona's most recent child support guidelines review found that 10 percent of orders for current support were set at \$100 or less.²¹ Statistics from neighboring states Colorado and Texas are not available. Nevada, which sets its minimum order at \$100 per child, applies its minimum order to a third of its cases.²² Only 126 (less than 1 percent) of the New Mexico orders analyzed were set at \$100 or \$150 per month, which is arguably the minimum order amount under the current schedule. This suggests that New Mexico is currently not applying an adjustment for low-income parents.

In the few orders set between \$1 - \$50 per month, the average compliance rate (percent of support paid) was 98.6 percent compared to 62.0 percent for all cases. This suggests setting orders at lower levels brings payment rates closer to full compliance. In turn, this is less likely to trigger enforcement mechanisms (e.g., driver's license suspension) that could have other unintended consequences such as affecting work commutes and access to the child.

The CSED automated system, like most state automated systems, does not track income imputation or orders entered through default. Research from other studies find income imputation and default to be highly correlated. To estimate the percentage of cases with income imputation, CPR calculated the order amounts for case scenarios assuming the obligated parent or both parents earned minimum wage. In turn, CPR searched the case file data for orders set at these amounts. If all orders set at these amounts are based on imputed income, it implied an income imputation rate of 13 percent. CSED administrators and staff believe this under-estimates the actual percentage of cases with income imputation. A comparison of the compliance rate between orders that appeared to be based on income imputation and those not based on income imputation re-enforces the federal basis for limiting income imputation: those that appeared to be based on income imputation paid less than those that did not (*i.e.*, the compliance rate was 52.4 percent among new orders that appeared to be based on income imputation while it was 63.3 percent among new orders that appeared not to be based on income imputation.) This reinforces the concept of establishing provisions that encourage thorough consideration of the parent's employability and earning capacity before imputing income.

²¹ Venohr, Jane. (August 2014.) *Arizona Child Support Guidelines Review: Findings from Case File Data*, Report to the Arizona Supreme Court, Administrative Office of the Courts., Phoenix, Arizona.

²² Venohr, Jane (2016). *Review of the Nevada Child Support Guidelines*, Report to the State of Nevada Division of Welfare and Support Services, Child Support Enforcement Program, Carson City, NV.

The analysis also compared New Mexico guidelines amounts to those of neighboring states for a range of case scenarios, including low-income scenarios. The amounts of the New Mexico guidelines were generally lower than those of neighboring states for middle incomes. Paradoxically, the New Mexico guidelines amounts were generally higher than those of neighboring states for low-income scenarios. This suggests updating the New Mexico self-support reserve is appropriate.

Analysis of Labor Market Data

Federal regulation also requires the analysis of labor market data. The intent is to gather information about the employability of low-skilled parents within a state to help inform income imputation provisions and provisions pertaining to the self-support reserve. In most states, parents involved in cases in government child support programs tend to have characteristics that limit their employability (e.g., few job skills or limited work experience). Although New Mexico's statewide unemployment rate was 4.7 percent during the time the Commission was gathering information, there are some counties in which the county unemployment rate is almost twice as much as the statewide average. In addition, the unemployment rate is higher for some subpopulations (e.g., 16.9 percent among American Indians in New Mexico). This underscores the importance of income imputation provisions that consider the local labor market conditions, as suggested in the federal requirement. The analysis of labor market data also reveals that a presumption of a 40-hour work week may not be appropriate since the average hours worked among all privately employed New Mexico workers is 34.2 hours per week.

SUMMARY OF RECOMMENDATIONS

After carefully reviewing the information gathered to meet the federal requirements, the Commission developed five recommendations. The recommendations use NCP to refer to the noncustodial parent or the parent obligated to pay support.

1. Updated Child Support Guidelines Schedule.

The Commission recommends the Child Support Enforcement Division prepare draft language for a statutory change to update the child support guidelines schedule using the schedule developed by the division's economist and described as Schedule G.3 in her supplemental information dated November 6, 2018 (See Appendix B). The Commission further recommends the Child Support Enforcement Division make efforts to have the proposed statutory changes enacted by the New Mexico Legislature, including seeking endorsement by the Governor's office, securing a sponsor for the legislation, and supporting the drafting of the legislation and the legislative process as the bill makes its way through committees and floor debate and votes. The Commission further recommends that

language be added to the statute that defines that the minimum order amount shall be the presumed support obligation for the NCP, when the combined monthly income is less than \$1000, and that the minimum order amount will not be split per the percentage of shared income as per the rest of the Child Support Guideline Schedule.

2. Support Orders Where Combined Monthly Income Exceeds \$30,000.

The Commission recommends the Child Support Enforcement Division prepare draft language for a statutory change that integrates the formulas developed by the division's economist and described in her supplemental information dated November 6, 2018, (See Appendix B) for calculating child support orders where the combined monthly incomes of the parties exceed \$30,000. The Commission further recommends the Child Support Enforcement Division make efforts to have the proposed statutory changes enacted by the New Mexico Legislature, including seeking endorsement by the Governor's office, securing a sponsor for the legislation, and supporting the drafting of the legislation and the legislative process as the bill makes its way through committees and floor debate and votes. The Commission further recommends that there be a footnote placed in the Statute that states that the \$30,000 limit in the child support guidelines does not represent a cap and that the Judiciary will continue to maintain the authority to establish/modify the support amount at the higher income levels.

3. Making the Self-Support Reserve Explicit in the Guidelines.

The Commission recommends the Child Support Enforcement Division prepare draft language for a statutory change to specify that the New Mexico child support guidelines include a self-support reserve, pursuant to appropriate citation. The Commission further recommends the Child Support Enforcement Division make efforts to have the proposed statutory changes enacted by the New Mexico Legislature, including seeking endorsement by the Governor's office, securing a sponsor for the legislation, and supporting the drafting of the legislation and the legislative process as the bill makes its way through committees and floor debate and votes.

4. Federal Requirements Regarding Income Imputation.

The Commission recommends the Child Support Enforcement Division prepare draft language for statutory changes to bring New Mexico into compliance with federal regulations on child support guidelines. Such language will describe the parameters, as defined pursuant to appropriate citation, around the imputation of income to a party in establishing or modifying a support order. The Commission further recommends the Child Support Enforcement Division make efforts to have the proposed statutory changes enacted by the New Mexico Legislature, including seeking endorsement by the Governor's office, securing a sponsor for the legislation, and supporting the drafting of the legislation

and the legislative process as the bill makes its way through committees and floor debate and votes.

5. Federal Requirements Regarding Incarceration.

The Commission recommends the Child Support Enforcement Division prepare draft language for statutory changes to bring New Mexico into compliance with federal regulations on child support guidelines, pursuant to appropriate citation. Such language will describe the parameters around incarceration such that it may not be treated as voluntary unemployment in establishing or modifying a support order. The Commission further recommends the Child Support Enforcement Division make efforts to have the proposed statutory changes enacted by the New Mexico Legislature, including seeking endorsement by the Governor's office, securing a sponsor for the legislation, and supporting the drafting of the legislation and the legislative process as the bill makes its way through committees and floor debate and votes. The Commission further recommends that the statute needs to be clear that incarceration does not exclude the minimum order amount from being ordered and that there are other factors that may determine what income could be imputed to the NCP, even while incarcerated, that the Court has discretion to determine in establishing the support amount.

ACKNOWLEDGMENTS

The Commission Chair gratefully acknowledges the assistance and expertise of each Commission member in their thoughtful contributions to the Commission's deliberations when making recommendations.
